

# Precision Spiral Bevel Gear for ATV Final Drive

Made for tough trail loads—steady power transfer and long wear life in compact final drive housings.

**ISO 1328 Grade 6-8**  
**Hardness HRC 58-52**

**OEM / DFM Support**

**Superior Meshing Stability**

Controlled lead and tooth profile for lower vibration, lower noise, and more stable meshing.

**Enhanced Material Durability**

Heat-treated steel options for higher wear resistance, fatigue strength, and service life.

**Transparent Quality Traceability**

Inspection reports support quality records and batch traceability.

Item	Specification	Typical	Notes
Module	1 - 5	2 - 4	As drawing
Pressure Angle	15 – 25°	20°	As drawing
Process	Milling / Forging / Powder Metallurgy	Milling / Forging	As drawing
Materials	20CrMnTi / 8620H / 20CrMo / 40Cr / 42CrMo / 45#steel / Others	20CrMnTi	As drawing
Heat Treatment	Carburized & Quenched / High-frequency Quenched / Nitrided	Carburized	As drawing

**Drawing Review:**  
Fast response & DFM feedback to evaluate manufacturability.

**Process Recommendation:**  
Optimization of manufacturing routes based on requirements.

**Prototype to Production:**  
From single sample to mass production lots, Meet the demands.

**Final QC & Export:**  
Export-ready packaging and full QC documentation.
